Web Developer · Video Editor · Digital Content Creator

PROFESSIONAL SUMMARY

Video editor and web developer at BK Educational and Welfare Society, with a B.Sc. in Computer Science (2026) and an M.Sc. in progress. I design interfaces, build websites front to back with React, Node.js and MongoDB, and edit video for social media, education and promotion. I use AI tools where they make the work faster or better, and I bring the same attention to detail to a web page, a poster or a timeline.

WORK EXPERIENCE

Video Editor & Web Developer BK Educational and Welfare Society

2026 – Present

- Edit the society's Instagram reels from first cut to final delivery: classroom promos, campaign videos and festival coverage.
- Produce educational and promotional videos for students and the wider community.
- Built bkscience.in, the academy's website: React and Vite front end, Node.js, Express and MongoDB back end, with admission forms, Razorpay fee payments, an AI support chatbot and an admin panel.
- Built an attendance management system for the society's classes.
- Use AI video generation tools to speed up production.

Designer / Intern Bizunite 2025

- Designed interfaces and screen layouts for responsive web and mobile app prototypes.
- Created promotional posters, brand identity and product design materials within brand guidelines.
- Worked with the wider team from first idea through design review to final asset handoff.

SELECTED PROJECTS

BK Science Academy website bkscience.in 2026
Full-stack site for a JEE and NEET coaching institute: React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Razorpay payments, AI support chatbot and admin panel.

BK Attendance Management System 2026
Web application for marking and tracking attendance in the society's classes.

Instagram reels @addictedtomusic86 2025 – 2026
Promotional and event reels for BK Society, and anime edits for my own page.
